Trans. of \*Vopr[osy] Virusol[ogi] (USSR) 1960, v. 5,

DESCRIPTORS: \*Influenza viruses, Man, \*Respiratory  
diseases, Horses, Swine, Birds, \*Viruses.

Antigenic affinity of the duck and horse influenza vi-  
ruses was demonstrated only in the complement-fixa-  
tion test. In the haemagglutination-inhibition test and  
the neutralization test no evidence was given of the  
presence of common antigens in these viruses and the  
human influenza viruses nor in the duck, horse and  
swine viruses. Both strains of the duck virus (English  
and Czechoslovak) are allied but not identical. (Author)

The ignition delays of Diesel fuels were studied by means  
of photocells in the Wentzel experimental bomb. The  
ignition delay is the time which elapses from the begin-  
ning of injection of the fuel until the first radiation sets  
in. A process is mentioned which makes possible the  
rapid recording of the beginning of the radiation for any  
wavelength, using photocells and color filters which
